DETAILED ACTION

Drawings

1. The drawings are objected to because there are no descriptive text labels for elements (8), (18), (21), (31), and (11) – (14) of figure 3. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2611

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1, 3, 4, 6-10, 13, 16 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Sih et al (US 2002/0123316).

Regarding claims 1, 3, 4, 6-10, 13, 16 and 17, Sih, as shown in figure 2, teaches a method and apparatus for correcting frequency in a receiver comprising a first control system (when the switch is at position A, "Mode A", including all of the elements associated with the loop) to correct the frequency discrepancy applied to the mixer stage (204) and a second control system (when the switch is at position B, "Mode B", including all of the elements associated with the loop) to corrected the frequency discrepancy in digital in accordance with the algorithm from the digital rotator. See also paragraphs [0031] – [0052].

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Application/Control Number: 10/811,100

Art Unit: 2611

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Page 4

6. Claims 2, 11, 12, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sih et al (US 2002/0123316) in view of Rives et al (US 2004/0208263).

Sih teaches all subject matter claimed except for using a CORDIC. See explanation of section 3 above. However, using a CORDIC for performing the phase rotating is well known in the art of digital communications. Moreover, Rives, from the same field of endeavor, teaches frequency correction loop using CORDIC which perform phase rotating. See Rives: figure 2. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Sih by implementing the phase rotator (208) using the CORDIC since it is just one of the alternative way of implement the digital phase rotator.

Page 5

Allowable Subject Matter

7. Claims 5 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

- 8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Saka et al (US 6,023,491), Takahiko (US 2002/0051503) and Hasegawa (US 6,571,088) are cited because they are pertinent to frequency correction loop. However, none of the cited references teaches or suggests the switching of the correction loop based on the reception mode is being changed over to another base station as recited in claims 5 and 15.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DON N. VO whose telephone number is (571) 272-3018. The examiner can normally be reached on Mon-Fri (9:00AM 6:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAY PATEL can be reached on (571) 272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
